

DISCOVER **END-TO-END** IT

Our mission is simple: We want to help you power a new way of work. Let us show you why **easy** is more than just a name, but a commitment to our digital world.

COMBINE THE SUPERPOWERS OF ITSM & ITOM

Take your IT to the next level with proactive and predictive tools to resolve issues, prevent downtime, and thrive.

IT SERVICE MANAGEMENT

Tackle even the most complex requirements while bringing the **simplicity, agility, and mobility** needed to make cloud-based IT Service Management (ITSM) software **easy to use and easy to deliver**.

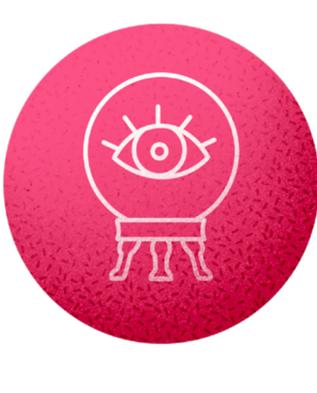

IT SELF SERVICE

Utilize **chatbots, virtual agents, and engaging portals** to empower users with self-healing to **resolve simple incidents and IT service requests**. Save support staff's resources and educate users all at the same time!

IT REMOTE SUPPORT

Embrace a remote support access solution with endpoint management and unique process automation abilities to give agents a **complete view of IT services** and the tools to **proactively fix issues**.

IT MONITORING

Increase efficiency and satisfaction by predicting and avoiding downtime with a **360-degree view of your IT infrastructure** to accurately **predict and prevent downtime**.

third party integrations

WHY COMBINE ITSM & ITOM?

Deliver **seamless digital experiences** that **empower users**.

Employee and customer satisfaction by improving and modernizing digital experiences

Productivity improvement thanks to an efficient workflow engine, automation, and agile deployment

TCO reduction thanks to low code implementation features and a quick-start implementation program

Support business outcomes, increase service support efficiency, and business satisfaction by predicting and avoiding downtime

Get **actionable insights** and **prevent incidents** with trusted monitoring technology.

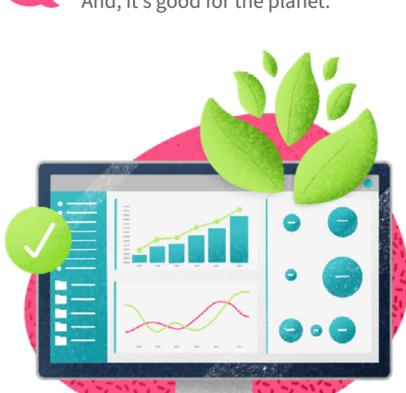

Real-time monitoring and alerts of supervised assets enabling a proactive approach to keep your business services up and running with a native ITSM solution integration

TCO reduction thanks to transparent and efficient communication with the IT Health Status and on-call costs reduction with our future-ready AIOps technology

And, it's good for the planet.

Reduce carbon emissions by 30% through user device reduction and increased cloud adoption
